KING COUNTY HOUSING ANALYSIS

NAME OF PROJECT:

Data Science EDA Project

PRESENTED BY:

Leya Huseynova

Agenda

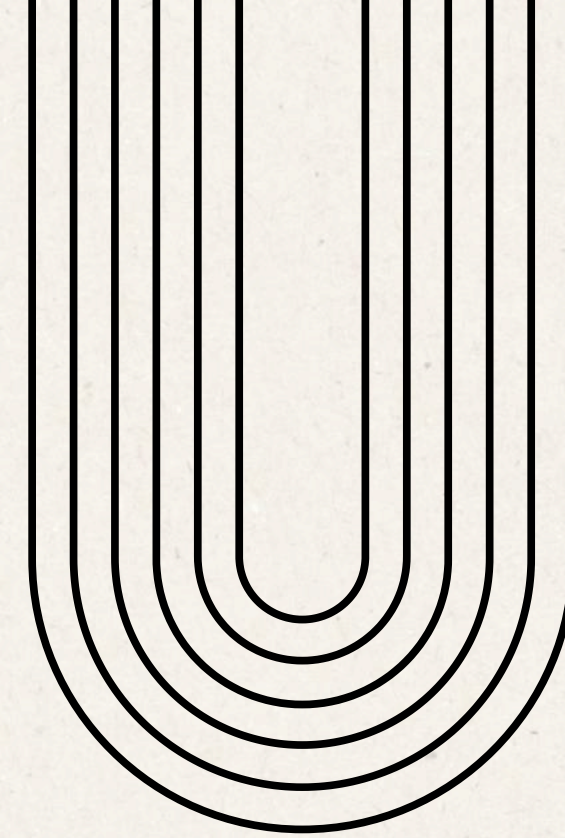

01	Overview
02	Goals and client's vision
03	Analysis
04	Suggestions
05	Insights
06	Team
07	Contacts
08	Additional slides for Q&A

Overview

This project analyzes the local housing market to help Nicole Johnson make an informed decision about purchasing one of three recommended houses.

Goals

Goal # 1

Assess how a location
influences home prices

Goal # 2

Determine the impact of
renovations on price

Goal # 3

Evaluate whether Nicole
can find an affordable
home in a lively, central
neighborhood

Client's vision

Nicole Johnson is looking to buy:

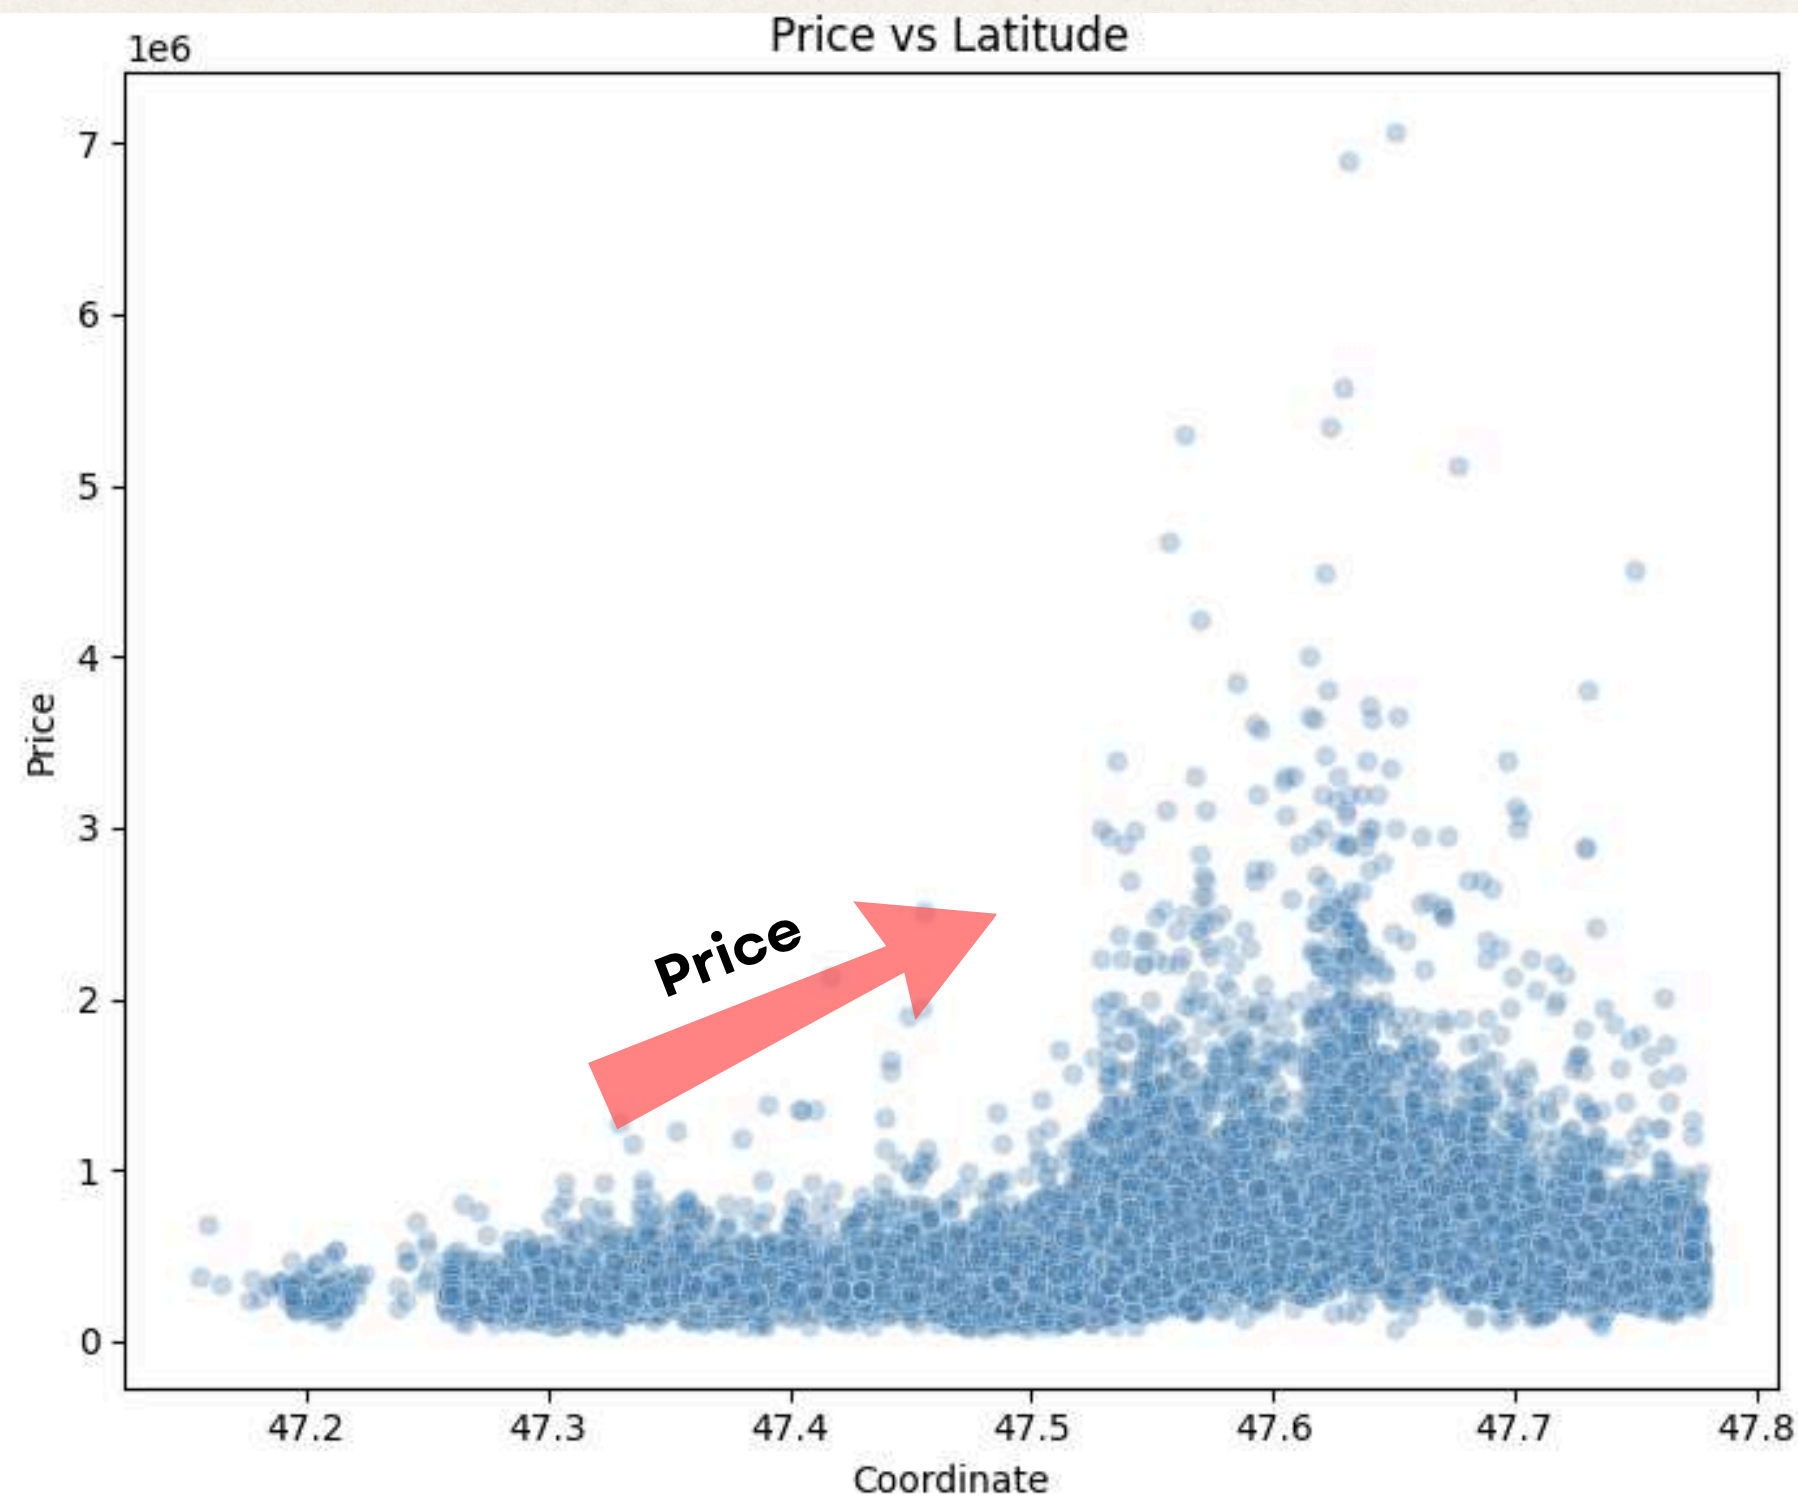

- A home in the **Seattle** area
- In a **lively, central** neighborhood
- In the **middle of the price** range
- All within **the next year** - so understanding the right timing and seasonal price trends is important

A1: Houses in central/northern coordinates have higher prices

06/14

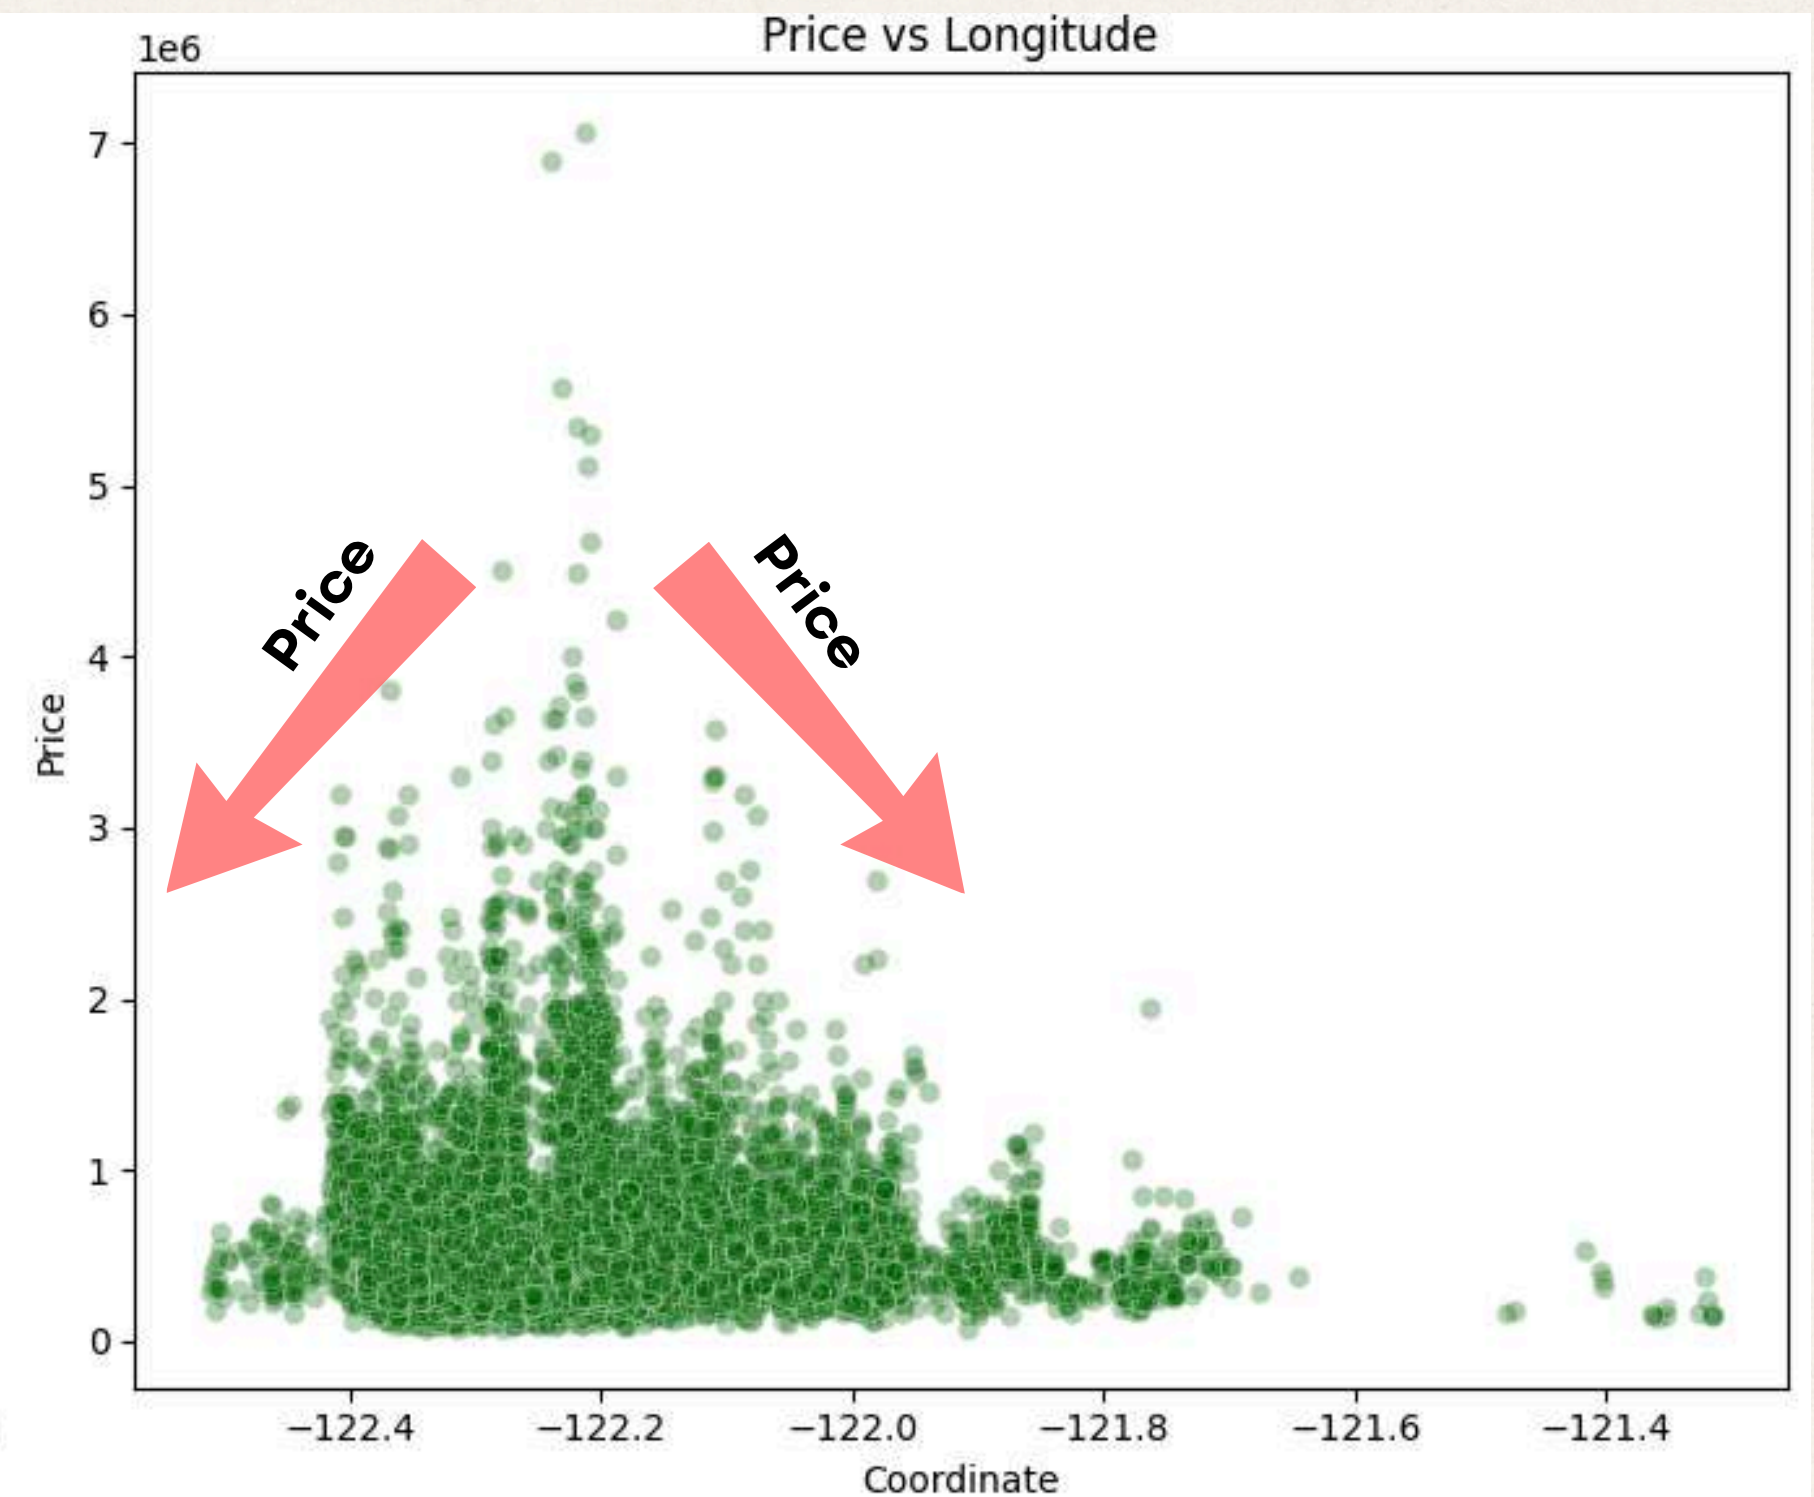

Price increases as you move North

Houses farther north—closer to Seattle city center and upscale northern neighborhoods—tend to be more expensive

Price increases in the City Center

Lower prices as you move farther East or West. The main takeaway is that housing costs are highest in the central area

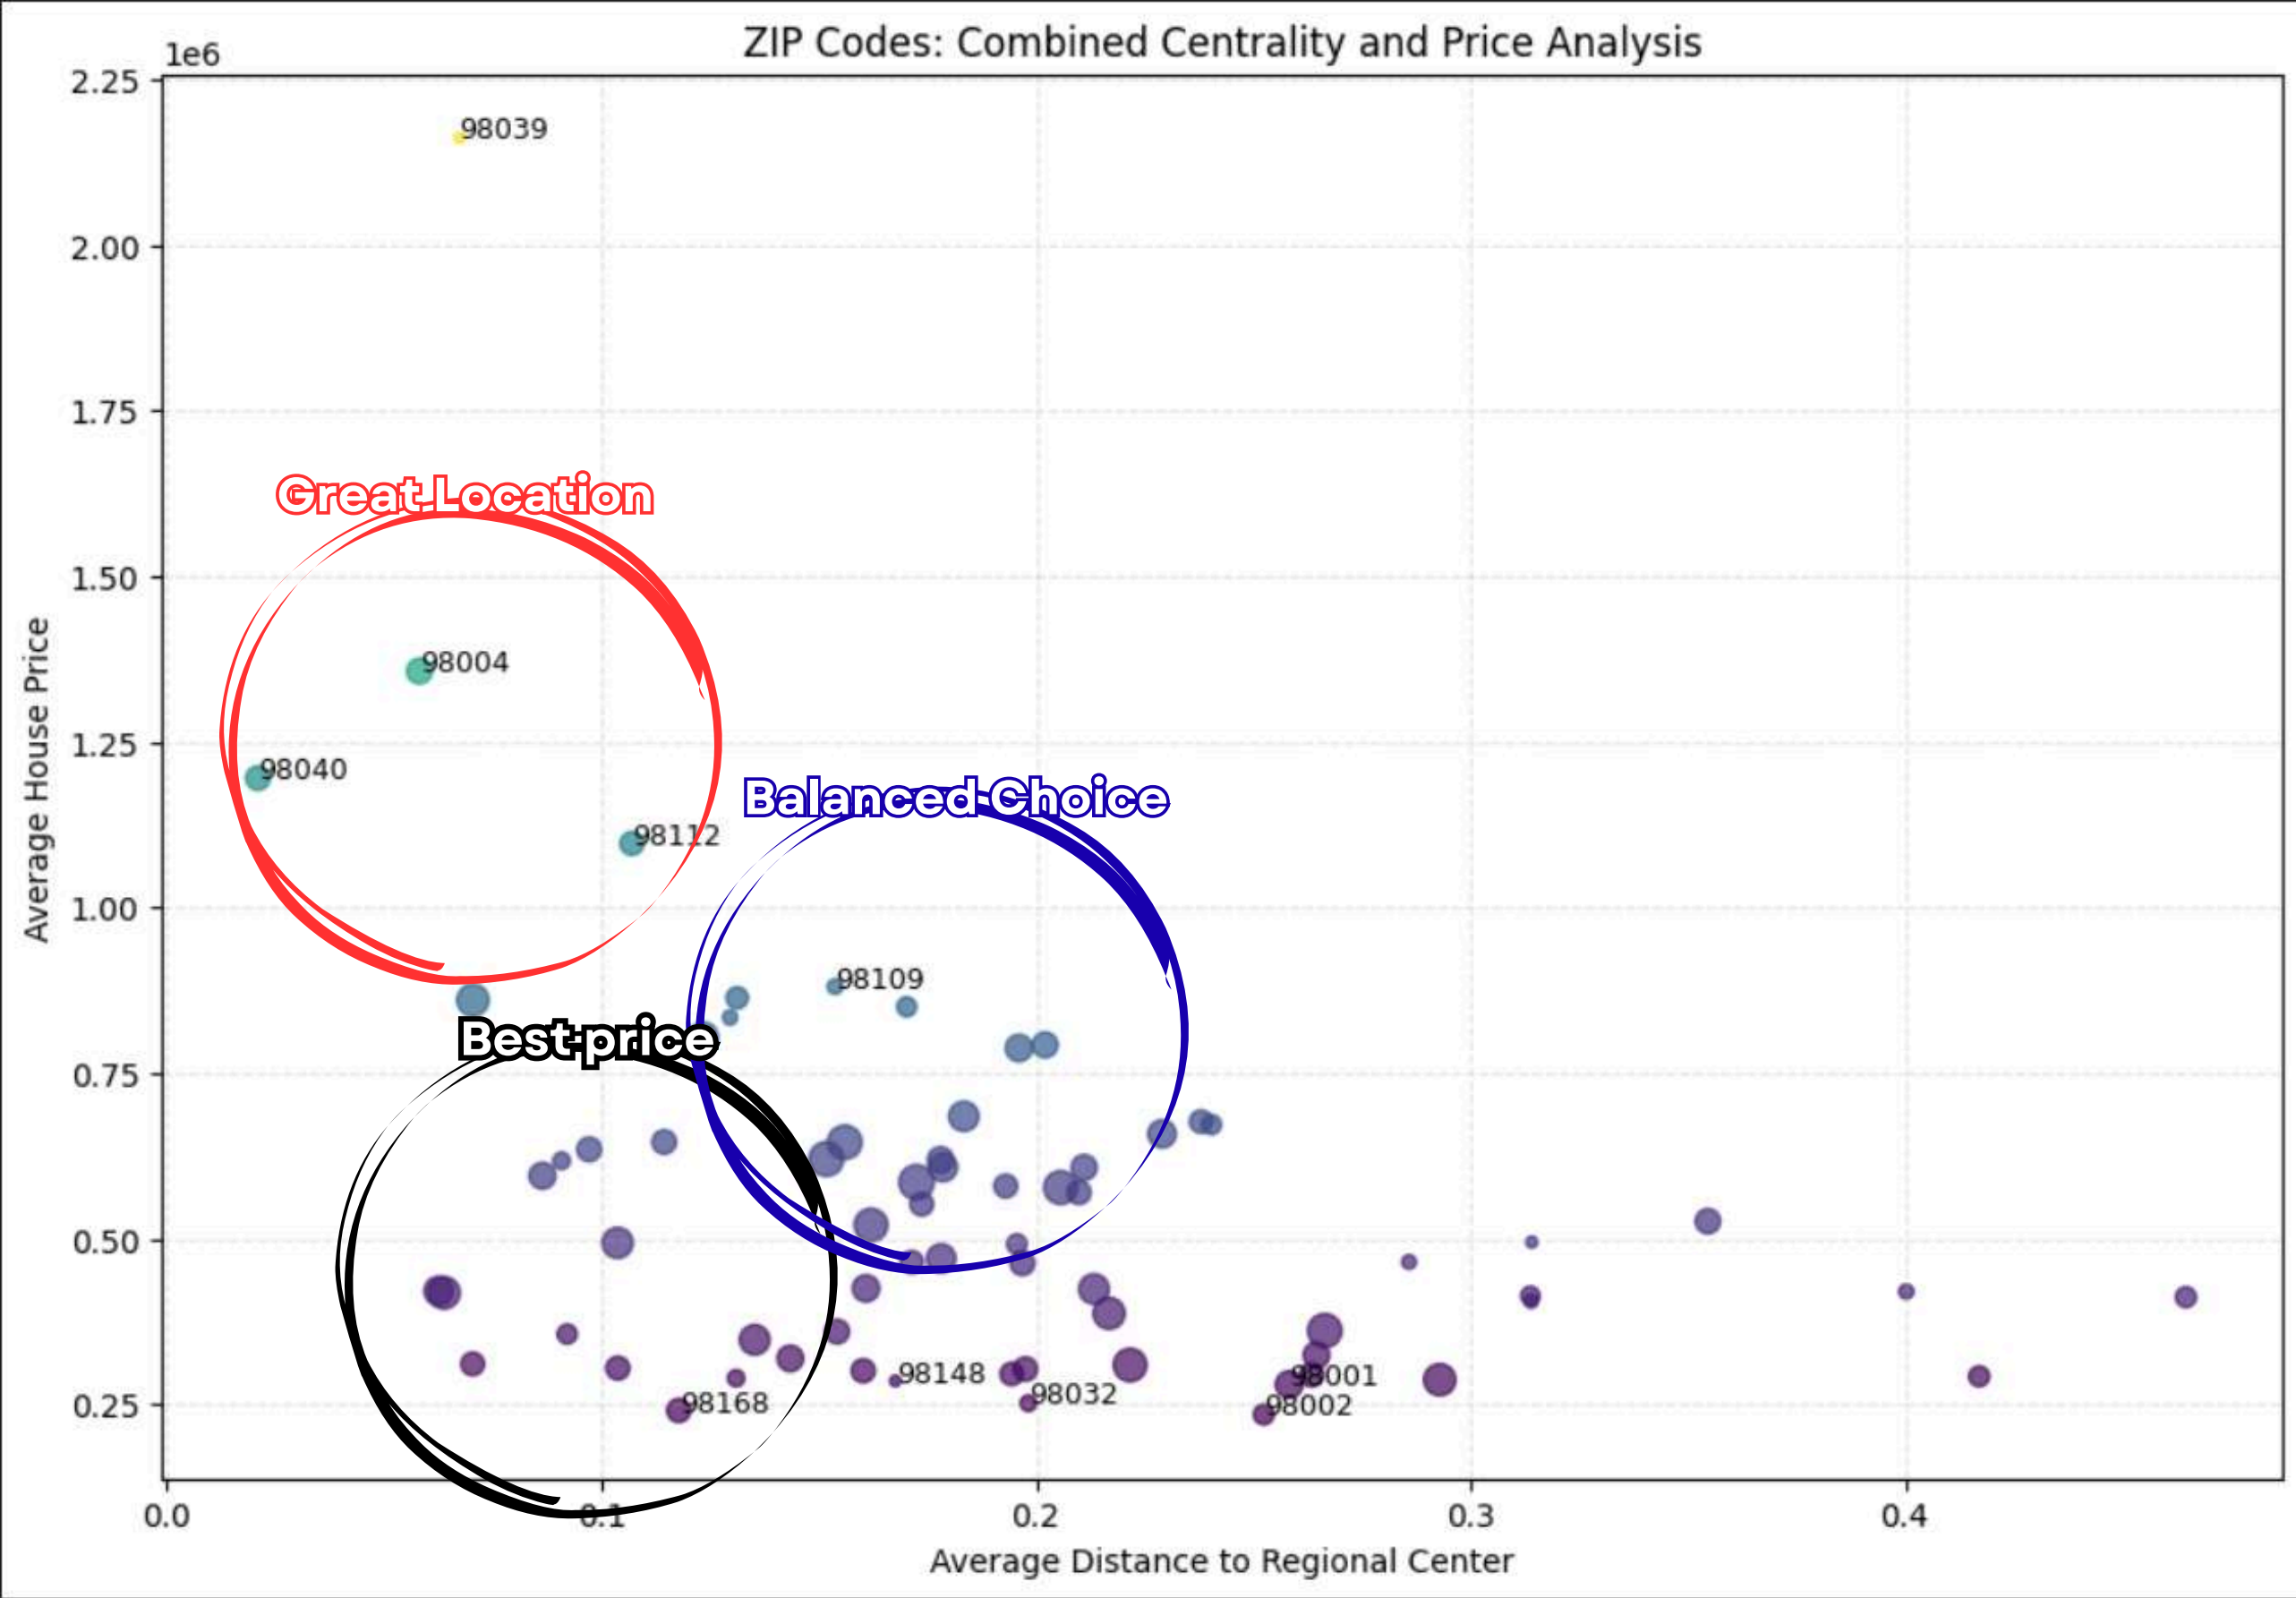

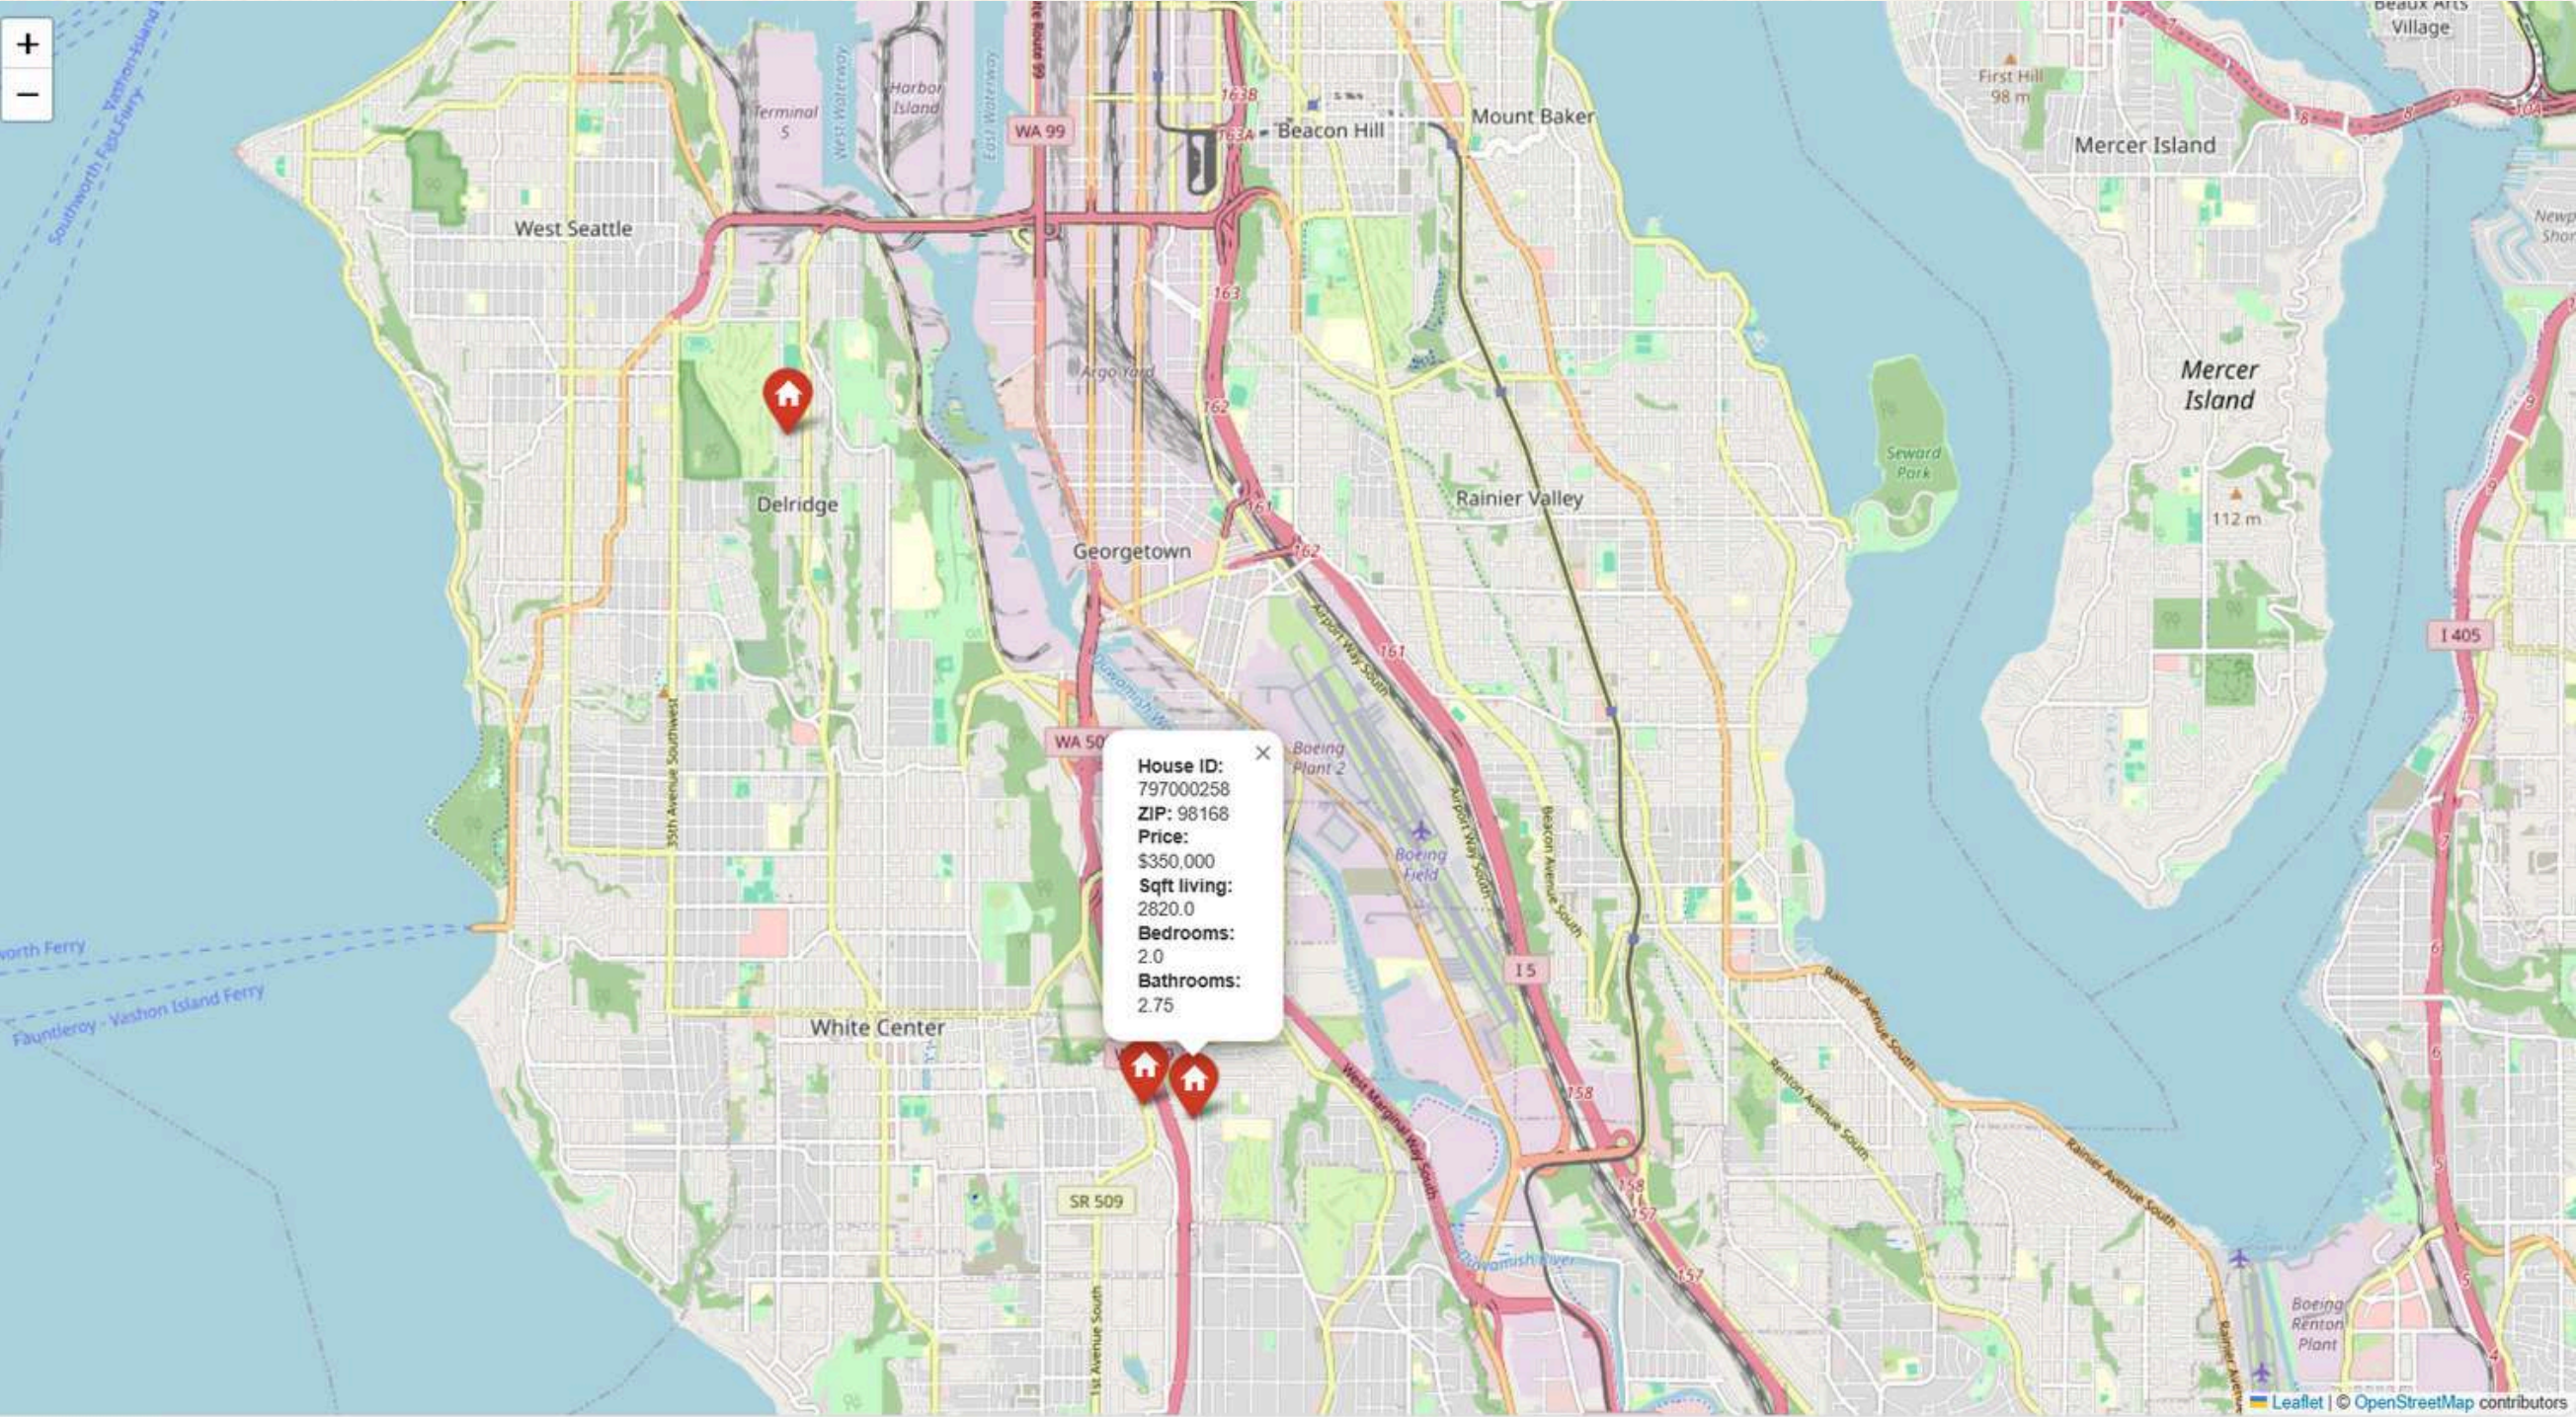

A2: Renovated houses tend to be more expensive than non-renovated houses

07/14

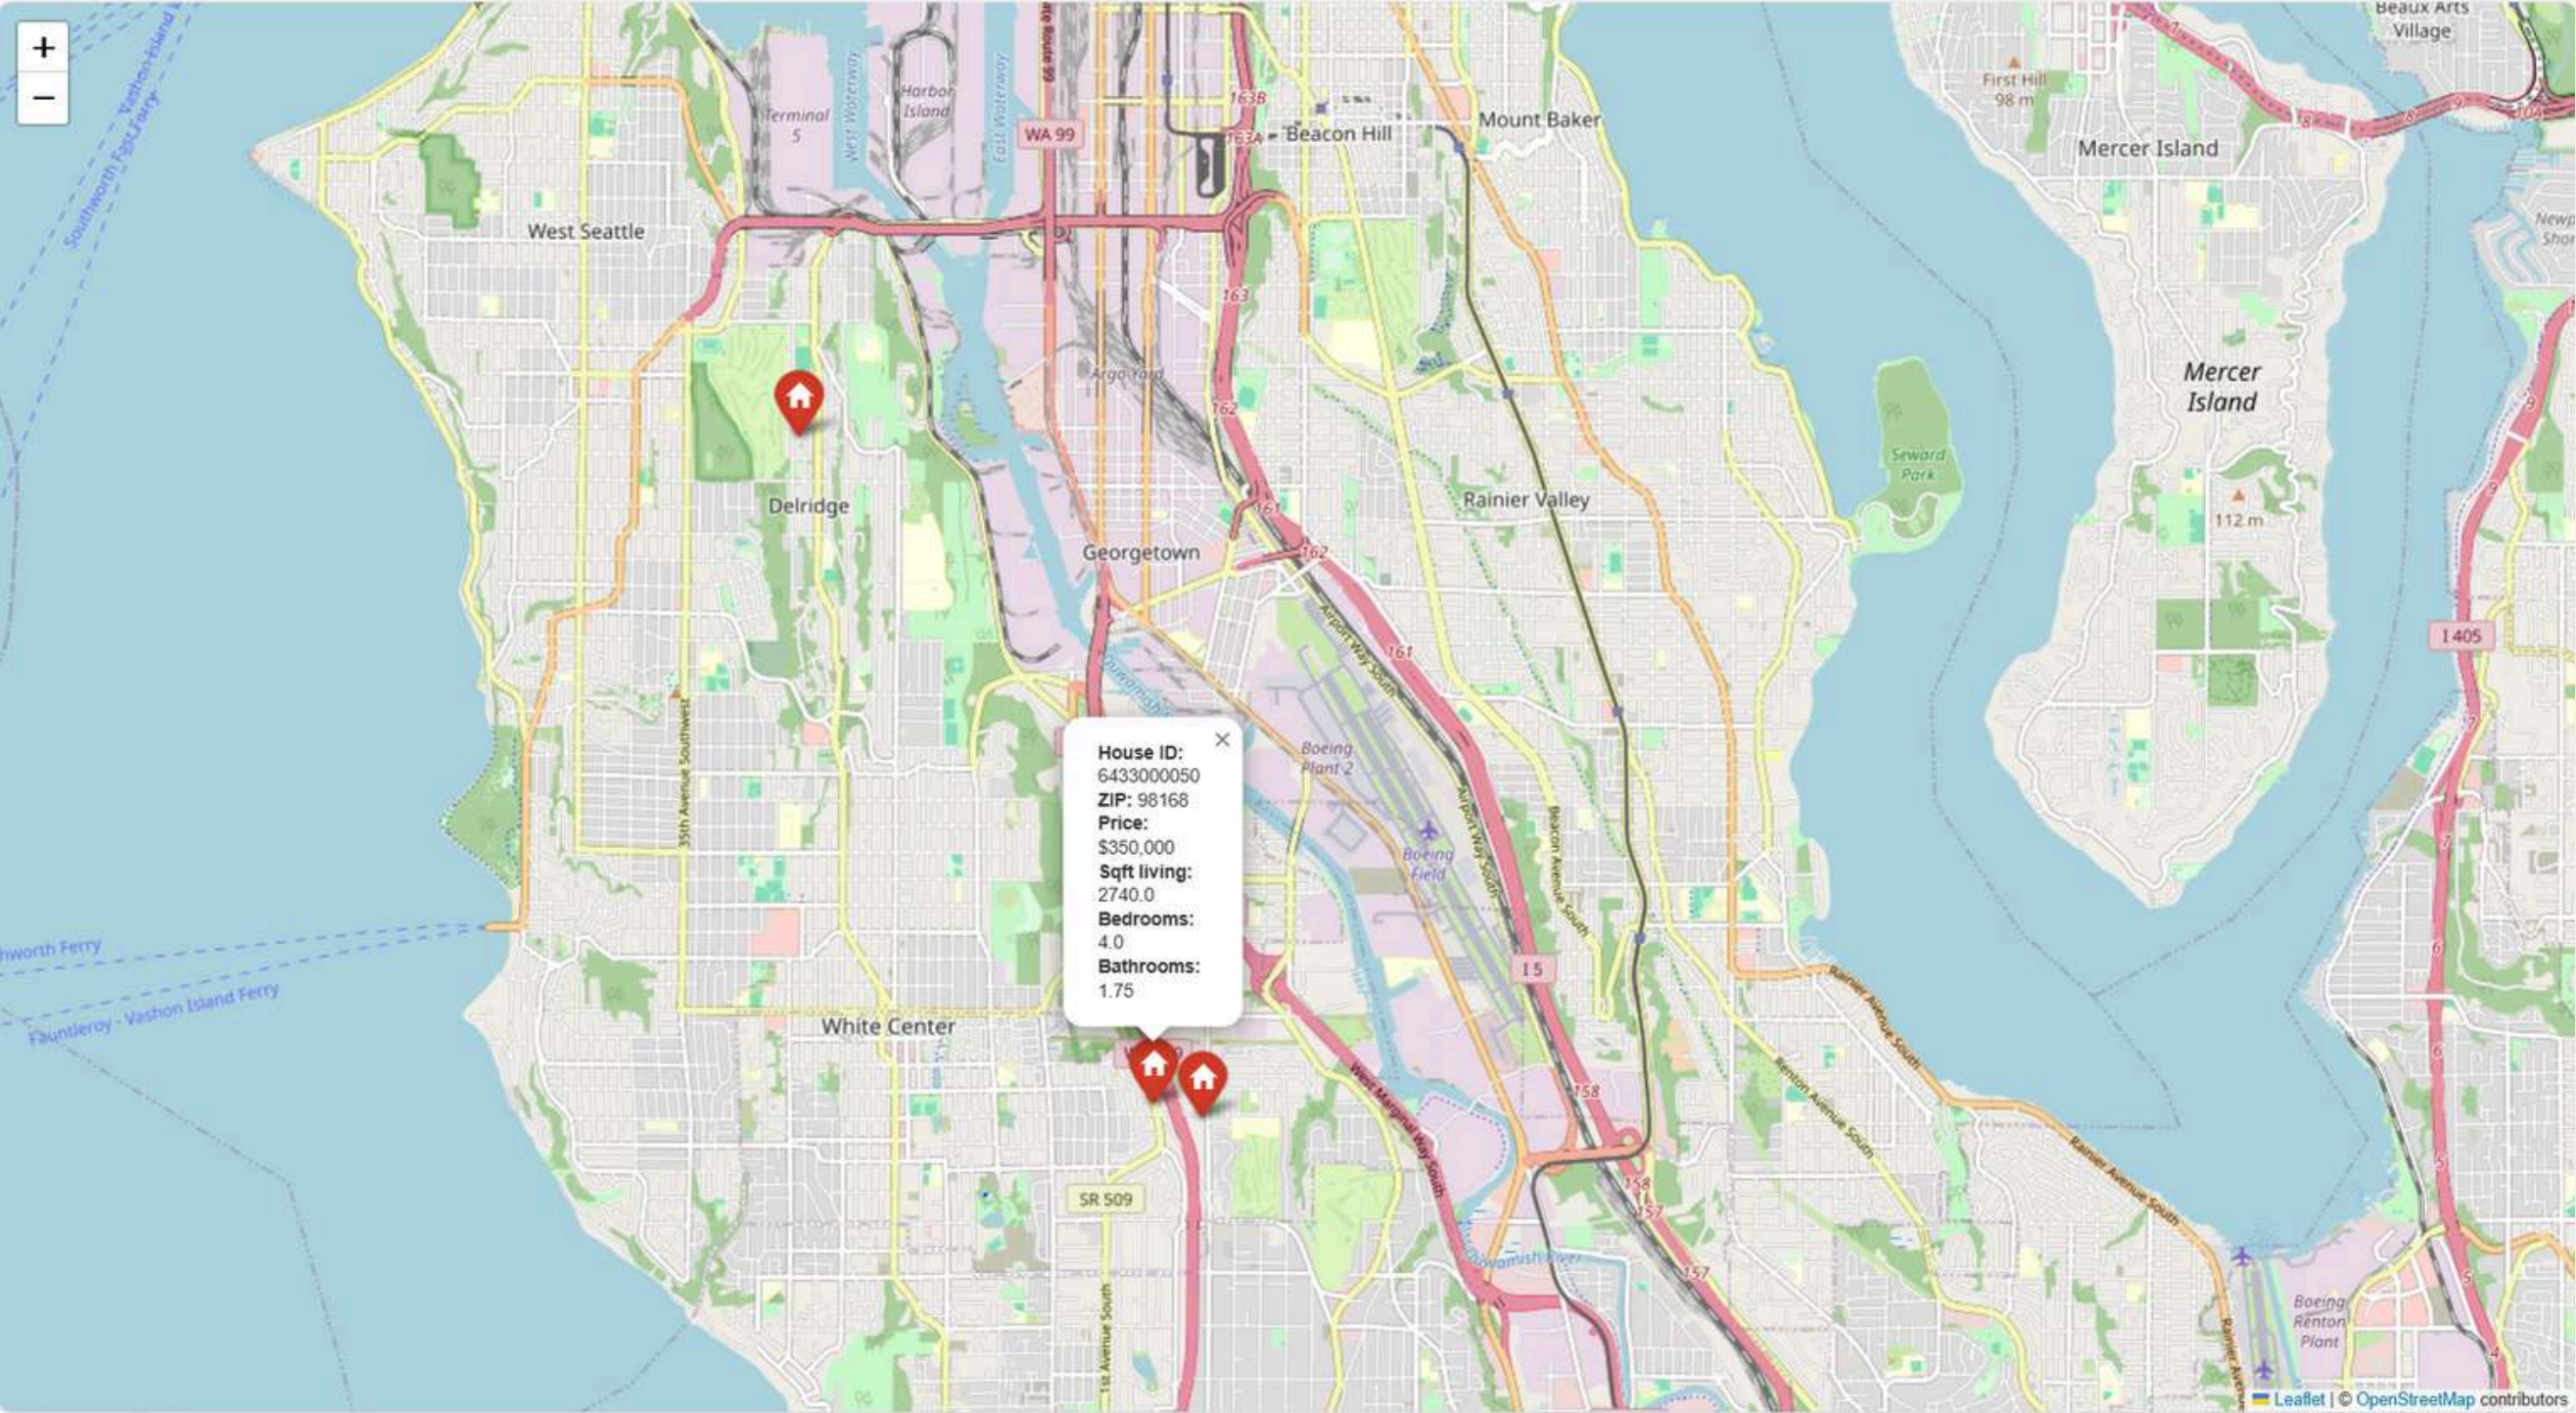

- Renovations can raise house values in this market.
- Renovated houses vary more widely in price

 House A/Price: \$350,000

Feature Category		Description Details
	Rooms (Beds & Baths)	2 bedrooms, 2 full baths + ¾ bath
	Space (Sq Ft)	2,820
	Condition (Year Built, Reno)	Built in 1947 , not renovated, well-maintained
	Lot Size	11,770 sqft
	Extra Details	Budget friendly neighborhood with great access to Seattle

House B/Price: \$350,000

Feature Category		Description Details
	Rooms (Beds & Baths)	4 bedrooms, 2 bathrooms
	Space (Sq Ft)	2,740
	Condition (Year Built, Reno)	Built in 1972, not renovated newer than most homes in this price range
	Lot Size	10,086 sqft
	Extra Details	affordable central-south cluster

House C/Price: \$350,000

Feature Category		Description Details
	Rooms (Beds & Baths)	5 bedrooms, 3 bathrooms
	Space (Sq Ft)	2,320
	Condition (Year Built, Reno)	Built in 1963, not-renovated, has strong potential for updates
	Lot Size	8,400 sqft
	Extra Details	northern part, still in the same price range

Renovated houses **cost more**, but **not proportionally**

Renovated houses are usually **more expensive**, but the **price difference** is **not extreme** enough to eliminate unrenovated homes from consideration

Location has the **strongest** impact on **Price**

The **most affordable areas** that still offer central access are **south-central** ZIP codes like 98168, 98106, and 98108

Supported by Latitude and longitude analysis, plus ZIP code averages.

House **prices** show **seasonal patterns**

Prices typically **dip during late autumn** and winter months. They **rise again during spring** and summer when demand increases
